

Maintenance Hardwood Decking

VERSION 1.150617 | 17 JUNE 2015

woodandbeyond.com

A well maintained garden can easily become your sanctuary where you can escape from the day to day rat race of life.

A well maintained hardwood decking will last for many many years and will prevent it from becoming a slippery surface.

How To Clean Your Garden Decking

1

Clear the area - Make sure the decking surface is free of any obstacles so you can concentrate on cleaning rather than moving chairs and tables around. Do not drag any piece of furniture around and consider getting a helping hand for this step.

2

Brush thoroughly - Using a stiff broom, give the deck a thorough brush followed by jet wash using a pressure washer if you have one. Those which are used as multi-purpose home jet cleaners will work best and will ensure not to damage the wood.

3

Use warm water and soda crystals - To clean the decked surface on a budget and to minimise wastage, use warm water and soda crystals. Spray warm water over the decked surface and sprinkle soda crystals. Leave the area to dry for a few hours and once dry brush using a stiff broom.

4

Use dedicated cleaners - There are a number of chemical cleaners which will both clean and rejuvenate the timber. We recommend Rustins Decking Cleaner is offered for great value for money, is quick to dry and ready to use instantly.
