

# WATER-RESISTANT & WORRY-FREE

## 5G Dry waterproof technology with a high moisture resistant Compositetek core

5G Dry is an add-on for the proven 5G fold down installation system that provides enhanced water-resistance by preventing water from penetrating into the joints of the floor panels. With greater protection to withstand the mess of everyday chaos such as spills, this innovation makes floors both incredibly easy to install and to live with.

In wood-based floorings, 5G Dry contributes to significantly lower edge swelling, thereby ensuring that the floor both looks and feels better despite being subjected to wet mopping, accidents and other events resulting from everyday use.

No gluing or nailing is required. All you need to install the floor panels is one person, one pair of hands and a single movement. And, if ever needed, it's just as easy to dismantle. With 5G you can significantly reduce installation time, no matter if you are a professional or DIY.

## Easy to install with 5G fold down

*Since its launch in 2004, the patented 5G technology has been used by licensees worldwide in the production of more than 1.3 billion m<sup>2</sup> of flooring*
